PROJECT PLAN DOCUMENT

Project number	***49***
Project Title	Social Venture Partner – Engagement Analytics Dashboard
Document	Project Plan
Creation date	***12/02/2026***
Created By	Athmeeya M Kashyap, Yogansh
Client	Mr. Raja Poladi, CDiTH (IIITH – Internal)

Brief problem statement

Social Venture Partners (SVP) India manages a large network of partners engaged with numerous non-profit organizations through mentorship, financial contributions, volunteering, and strategic advisory. Currently, SVP relies on fragmented tools like NotebookLM and Excel spreadsheets, which limits their ability to analyse participation patterns, identify collaboration opportunities, and derive meaningful insights. The objective is to develop a comprehensive Engagement Analytics Dashboard that consolidates partner management and analytics into a unified platform with intuitive visualizations, enabling data-driven decision-making to enhance partner participation, strengthen NGO collaborations, and maximize philanthropic impact.

Team Members

Athmeeya Kashyap - 2024113015 - > Frontend (UI/UX Designer)

Navneet Gupta - 2024111030 - > Backend (Database Administrator)

Prashant Vinod - 2024101116 - > Frontend (Coordinator & Analytics)

Sambhavi Singh - 2024117010 - > Backend (Backend Developer)

Somisetty Yogansh - 2024101006 - > Frontend (Frontend Developer)

Team Communication

The team will conduct regular meetings and maintain communication through the following channels:

Weekly Team Meetings: Every Wednesday at 8:00 PM for project status updates, milestone review, and sprint planning.

Communication Tools: The team will use WhatsApp and Microsoft Teams for daily communication, GitHub for code collaboration and version control.

Client Meetings: Weekly meetings with Mr. Raja Poladi on Wednesdays to demonstrate progress and gather feedback.

Development Environment

The project will utilize the following tools and technologies:

Development IDE: Visual Studio Code with relevant extensions for JavaScript, Python, and database management.

Frontend Framework: React.js for building the interactive dashboard interface with responsive design.

Backend Framework: Node.js with Express.js for API development and server-side logic.

Database: PostgreSQL for structured data storage with potential integration of MongoDB for flexible document storage.

Version Control: Git and GitHub for source code management and collaborative development.

Data Visualization: Chart.js and D3.js for creating interactive charts and analytics visualizations.

Documentation: Notion for project documentation, Swagger for API documentation, and Figma for UI/UX design mock-ups.

Deployment: AWS for cloud hosting.

Milestone Schedule

Milestone	Due Date	Release	Deliverable?
Conduct initial client meetings and problem understanding	21/01/2026	R1	No
Complete backend research and engagement dashboard analysis	21/01/2026	R1	No
Submit Project Synopsis document	26/01/2026	R1	Yes
Create draft requirements	28/01/2026	R1	No
Setup Git repository and communication channels	28/01/2026	R1	No
Finalize software requirements document (SRS)	04/02/2026	R1	Yes
Database schema design and setup	04/02/2026	R1	No
Complete system architecture design and technology stack selection	04/02/2026	R1	Yes
UI/UX mock-ups and wireframes	04/02/2026	R1	Yes
